

Pathway Orientation

Curriculum Alignment, Facilitation and Pilot Package — prepared for the Curriculum Development Centre, Zambia Ministry of Education

About This Package

Pathway Orientation is a self-scoring career-guidance workbook for Form 3 and Form 4 learners, built around seven work orientations (Order, Form, Coordination, Discovery, Integration, Preservation, Transformation). This package brings together the three components of its Guidance department submission: how the workbook aligns to the 2023 Zambia Education Curriculum Framework, how a facilitator runs it across three sessions, and how it is piloted in real classrooms before rollout. Cross-references between the three components below point to sections within this document.

The Seven Orientations at a Glance

Every part of this package — the curriculum mapping, the facilitator's guide, and the pilot toolkit — refers back to the same seven orientations and the same colour for each. This page is a visual key for the tables that follow.

PART ONE

Curriculum Alignment

Mapping the workbook to the 2023 Zambia Education Curriculum Framework

Purpose

This document maps the Pathway Orientation self-scoring workbook to the official Zambian secondary curriculum, as supporting evidence for its submission to the Curriculum Development Centre (CDC) for approval as a reader for use by the Guidance department in Form 3 and Form 4.

Source Document and What It Confirms

The 2023 Zambia Education Curriculum Framework establishes three things this mapping relies on directly.

Careers Guidance and Counselling is a cross-cutting theme, with four named areas

“Careers Guidance and Counselling are vital in the development of a well-balanced learner who is expected to fit in society and contribute positively to society. The four areas of Careers Guidance and Counselling of: Personal, Social, Vocational and Educational have been integrated in the curriculum so as to produce a well-balanced learner at all levels of education.”

— Section 5.10, p.42, 2023 Zambia Education Curriculum Framework

No dedicated weekly timetable period for Guidance and Counselling exists for Form 1–4 learners in this Framework, unlike core examinable subjects. This is consistent with its status as a cross-cutting theme rather than an examined subject. In practice this means the workbook is delivered during Civic Education periods, co-curricular time, or a dedicated Guidance department session arranged outside the formal timetable — see the facilitator's guide.

Secondary structure and the Ordinary Level Pathways

“Ordinary Level shall run for four (4) years from Forms 1 to 4 whilst Advanced Level shall run for two years from Forms 5 to 6.”

— Section 4.3, p.21

Form 3 and Form 4 — this workbook's audience — sit inside Ordinary Level, in the second half of a pathway learners were placed into at the start of Form 1. There are eight Ordinary Level Pathways:

Ordinary Level Pathway	Compulsory / core subjects
Social Sciences	English Language, Mathematics, Civic Education, Computer Studies + 1 core (Literature, Geography, History or Religious Education) + 2 others
Natural Sciences	English Language, Mathematics, Civic Education, Computer Studies + 3 core sciences (Agric. Science, Biology, Chemistry, Physics) + 1 other
Business and Finance	English Language, Mathematics, Civic Education, Principles of Accounts, Commerce, Computer Studies + 1 other
Agriculture Science	English Language, Mathematics, Civic Education, Agricultural Science, Computer Studies + 2 others
Home Economics and	English Language, Mathematics, Civic Education, Computer Studies + 1 core

Ordinary Level Pathway	Compulsory / core subjects
Hospitality	(Fashion & Fabrics, Food & Nutrition, Hospitality Mgmt or Travel & Tourism) + 2 others
Technology	English Language, Mathematics, Civic Education, Computer Studies + 1 core (Computer Science or Design & Technology) + 2 others
Performing and Creative Arts	English Language, Mathematics, Civic Education, Computer Studies + 1 core (Music or Art and Design) + 2 others
Physical Education and Sport	English Language, Mathematics, Civic Education, Biology, Physical Education, Computer Studies + 1 other
<i>“Placing of learners in the different pathways shall be done based on the results obtained at the end of the primary education examination and the interests of the learners. This shall be carefully done in order to properly guide the learners to make sound choices of the pathways, which will eventually allow them to have their desired fields of study and specialization at higher education level.”</i> — Section 4.3.1, p.21	

The Advanced Level Pathways — the decision Form 3/4 learners are actually approaching

Because O-Level pathway placement already happened at the start of Form 1, the live decision facing a Form 3/4 learner is less “which O-Level pathway” and more (a) whether their current pathway and subjects still fit as Form 4 finals approach, and (b) which of the five Advanced Level pathways to choose for Form 5–6.

“Subjects will be clustered in five (5) pathways namely STEM, Social Sciences and Languages, Business Studies, Sports Science and Creative and Performing Arts.”

— Section 4.3.2.1, p.25

“Guidance shall be provided on the subject combinations based on the pathway.”

— Section 4.3.2.1, p.26

This is the strongest single justification for the workbook's purpose in the Framework: guidance ahead of a pathway decision is explicitly mandated, twice, in the Framework's own words.

The Framework establishes the Personal-Social-Vocational-Educational (PSVE) structure and the pathway system with page-cited authority. It does not contain a separate, numbered, learning-objective-by-objective Guidance and Counselling syllabus of the kind subjects like English or Biology have as their own booklet — consistent with Guidance and Counselling's status here as cross-cutting rather than examined. This Framework is treated as the governing source for this mapping.

The Four PSVE Areas, Applied to This Workbook

PSVE area	What it covers	Workbook coverage
Personal	Self-understanding: interests, values, personality, working style.	Strong
Social	Interpersonal skills: working with others, relationships, teamwork.	Strong (with facilitator's guide)
Vocational	Knowledge of occupations and the world of work.	Strong (with facilitator's guide)
Educational	Subject choice, pathway choice, and educational planning.	Strong

Workbook-to-PSVE Mapping

Workbook section	Content summary	PSVE	How it is addressed
Introduction — “How Your Result Works”	Explains the dominant / secondary / shadow framing before the learner starts.	P	Orients the learner to reflect on their own patterns before self-reporting.
The Seven Orientations at a Glance	One-page overview of all seven work orientations.	P, V	Introduces the range of occupational orientations at a survey level.
How to Use This Workbook	Instructions for the 1–5 Likert scale and self-scoring steps.	—	Enables independent, unsupervised completion with no computer required.
Questions (42-item self-report instrument)	Six statements per orientation rated 1–5.	P	Structured self-reflection on working style and motivations.
Scoring Key & Score Lookup Table	Question-to-orientation key and score-to-percentage table.	—	Makes the self-assessment independently scoreable on paper.
Seven Orientation Profile pages	Calling statement, description, strengths, watch-out-for.	P	Deepens self-appraisal and names concrete trade-offs.
“Pathways to Explore” (per profile)	Subjects, fields of study, Zambian institutions, careers.	V, E	Converts a result into subjects and pathways defined by the Framework.

Orientation-to-Pathway Cross-Reference

This is the concrete link between each of the seven orientations and the official pathway it points a learner toward, and why.

Ordinary Level (Forms 1–4)

Orientation	Primary O-Level pathway	Why	Related pathway(s)
 Order Orientation	Technology	Precision, structure and building things map onto the Design & Technology / Computer Science core.	Natural Sciences (engineering entry); Business and Finance (Accounting)
 Form Orientation	Performing and Creative Arts	Direct match to the Music / Art and Design core subjects.	Home Economics and Hospitality (Fashion & Fabrics); Social Sciences (Literature in English)
 Coordination Orientation	Business and Finance	Organising people and resources matches Commerce and Principles of Accounts.	Performing and Creative Arts (event/music production)
 Discovery Orientation	Natural Sciences	Curiosity-driven investigation matches Biology, Chemistry and Physics.	Technology (Computer Science); Agriculture Science (environmental)
 Integration Orientation	Social Sciences	Helping and guiding others matches Literature, Religious and Civic Education.	Natural Sciences (Biology, for Nursing); Home Economics and Hospitality

Orientation	Primary O-Level pathway	Why	Related pathway(s)
 Preservation Orientation	Agriculture Science	Protecting and stewarding resources matches Agricultural Science.	Social Sciences (Civic Education/History, for Law); Physical Education and Sport (discipline)
 Transformation Orientation	Technology	Physics/Chemistry-driven innovation matches the Technology pathway's practical core.	Natural Sciences; Business and Finance (entrepreneurship)

Advanced Level (Forms 5-6)

Orientation	Advanced Level (Form 5-6) pathway it points toward
 Order Orientation	STEM
 Form Orientation	Creative and Performing Arts
 Coordination Orientation	Business Studies
 Discovery Orientation	STEM
 Integration Orientation	Social Sciences and Languages
 Preservation Orientation	Social Sciences and Languages
 Transformation Orientation	STEM

Scope note: two official pathways are secondary matches only

Physical Education and Sport (O-Level) and Sports Science (A-Level) are not the primary destination for any of the seven orientations as currently defined — Preservation is the closest secondary fit, via discipline and physical stewardship. Home Economics and Hospitality (O-Level) similarly has no orientation for which it is primary — Form and Integration touch it only as a secondary or related pathway.

This is a stated scope limitation of the current seven-orientation model, not an omission: learners drawn to sport or hospitality careers are served through the secondary and related pathway columns above.

Coverage Summary Against PSVE

Personal, Vocational and Educational are strongly covered. Social is addressed directly through a dedicated small-group activity: learners share a Pathways to Explore item, then discuss what each person's orientation would contribute to a shared class project and which orientation, if any, is missing from the group — see the facilitator's guide, Session 3.

Terminology Applied to the Workbook

The workbook's pathways content uses the Framework's exact subject names throughout:

- Where the Integration profile names a Home Economics subject, it names the specific subject — Food and Nutrition — rather than the pathway name “Home Economics,” since the Framework names the constituent subjects as Fashion and Fabrics, Food and Nutrition, Hospitality Management, and Travel and Tourism.

- Computer Studies is named as compulsory and non-examinable across all pathways; Computer Science is named separately as the examinable Technology-pathway subject, for orientations pointing toward Technology and data-related careers.
- Principles of Accounts is named as the O-Level feeder subject for the Order profile's tertiary Accounting field, matching the Framework's exact subject name.

PART TWO

Facilitator's Guide

Running the workbook across three sessions with Form 3/4 learners

This guide grounds the four official Careers Guidance and Counselling areas — Personal, Social, Vocational, Educational (PSVE) — used throughout in the 2023 Zambia Education Curriculum Framework, as set out in Part One above.

What This Tool Is — and Is Not

Say this to learners, and hold to it as facilitator

This IS a structured way to reflect on how you naturally like to work, and a starting point for a conversation about subjects and careers.

This is NOT a scientifically validated personality or aptitude test. Treat every result as a prompt for discussion, never as a verdict.

This is NOT a placement tool. No school uses a learner's result to assign, restrict, or override their subject choices. The learner and their family make that decision, with the facilitator's support.

Participation in the activity can be required as normal classwork. Sharing a personal result out loud is always voluntary.

Learning Objectives

By the end of all three sessions, a learner is able to:

- Describe their own dominant and secondary working style in their own words (Personal).
- Explain at least one realistic feature of what day-to-day work is like in a field connected to their result (Vocational).
- State one concrete decision or next step they intend to take before the end of term, and one person they will discuss it with (Educational).
- Name at least one subject, institution, or career example from their own Pathways to Explore section (Vocational, Educational).
- Identify one way their own working style could complement a classmate's different working style on a shared task (Social).

Preparation Checklist

- Enough copies of the Pathway Orientation workbook for every learner, or a plan for shared/photocopied use.
- Pens or pencils.
- This guide, read in full, with the world-of-work notes marked up in the facilitator's own words.
- A copy of the syllabus mapping (Part One) for the facilitator's own reference, not for learners.
- Awareness of the school's normal safeguarding/referral route, in case Session 3 surfaces a learner who needs individual follow-up.

Suggested Session Plan

Three single periods work well. If a school only has double periods available, Sessions 1 and 2 can be combined; Session 3 stays separate, since it needs unhurried discussion time.

#	Session focus	Time	Domain(s)	What happens
1	Introduction & Self-Assessment	~40 min	Personal	Ground rules, framing, complete the 42-item questionnaire
2	Scoring & Reading Your Result	~40 min	Personal	Self-score using the Scoring Key and Lookup Table; read own profile pages
3	World of Work, Decisions, Pathways & Working Together	~45-85 min	Vocational, Educational, Social	Facilitator input on realities of each orientation's work; goal-setting worksheet; pathways discussion with a teamwork reflection

Session 1 — Introduction & Self-Assessment

PSVE area: Personal

- Welcome learners and explain, in the facilitator's own words, what this tool is and is not.
- Set ground rules: honest answers, no right or wrong answers, no need to show anyone else your answers, and sharing your result later is always optional.
- Hand out workbooks (or arrange shared use) and read the instructions and 1-5 scale together as a class.
- Let learners work through all 42 questions individually and silently. Circulate to answer procedural questions only — not to help them decide how to answer.
- Collect workbooks if reusing them, or ask learners to keep them safe until Session 2.

Session 2 — Scoring & Reading Your Result

PSVE area: Personal

- Remind learners of the Session 1 ground rules.
- Walk through the Scoring Key as a class: which question numbers belong to which orientation.
- Let learners total their own raw score per orientation, then use the Score Lookup Table to convert each to a percentage. Working in pairs to check each other's addition speeds this up.
- Once each learner has their Dominant, Secondary and Shadow orientation, let them read their own three profile pages silently.
- Close with one private, written reflection (not collected): "What is one sentence from your Dominant profile that felt true?"

Session 3 — World of Work, Decisions, Pathways & Working Together

PSVE areas: Vocational, Educational, Social

The printed workbook is strongest on self-awareness (Personal) and on naming subjects/institutions (Educational). This session supplies what the work is actually like day-to-day (Vocational), explicit decision-making (Educational), and working with people whose orientation differs from your own (Social).

World of Work (Vocational)

Read or paraphrase the note for each orientation represented in the class. Keep it honest — including the less glamorous parts named below is deliberate.

Orientation	What the work is actually like
 Order Orientation	People with strong Order often end up in work where a small mistake matters a lot — a wrong measurement on a building, an error in an accounts book. Much of the day is quiet and methodical: checking, planning, and following procedures precisely, sometimes for months before a project is finished.
 Form Orientation	Creative work often means long stretches with no fixed instructions — you decide what “good” looks like yourself. Income can be irregular, especially early on, and most people in creative fields also do other paid work alongside their craft.
 Coordination Orientation	This work is mostly about people, not tasks — meetings, phone calls, and sorting out clashes between what different people want. It can be tiring because your day depends on everyone else's day going to plan, which it often does not.
 Discovery Orientation	Research and exploration work is slow. Real discoveries can take years, with many failed attempts along the way. It suits someone who can stay curious and keep trying even when most experiments or investigations do not succeed.
 Integration Orientation	Teaching, counselling and mentoring work is emotionally demanding as well as practically demanding — you carry other people's setbacks alongside your own. It is also often paid less than its importance deserves, which is worth naming honestly.
 Preservation Orientation	This work often means being the one who says no, holds a line, or insists on doing things properly when it would be quicker not to. It can be thankless day-to-day, and is usually only noticed when something goes wrong that it prevented.
 Transformation Orientation	Change-focused work is unstable by nature — you may need to start over more than once, and not every idea or business will succeed. Financial security often comes later than in more traditional careers, if it comes from this path at all.

Decision-Making Worksheet (Educational)

Give each learner a few private minutes to write short answers, in their exercise book:

- My dominant orientation is _____. One thing that surprised me about my result is _____.
- One subject I will pay more attention to this term because of today is _____.
- One career or field from my Pathways to Explore that I want to find out more about is _____.
- One person I will talk to about this before the end of term is _____.
- One thing that could get in the way of this plan, and what I will do about it, is _____.

Pathways Discussion & Working Together (Educational, Vocational, Social)

In small groups (mixed dominant orientations work best), learners share one item each from their own Pathways to Explore section — a subject, institution, or career example — and why it appealed to them.

The facilitator then poses this question to each group: “Imagine your group has been given one shared class project. Looking at each person's dominant orientation, what would each of you naturally be good at contributing? Is there an orientation missing from your group, and how could you cover for that gap together?” Groups get 5–8 minutes to discuss, then one or two groups share one insight with the whole class.

Close with a whole-class round of one word each learner is taking away from today.

Adaptations for Resource-Constrained Settings

- Not enough printed workbooks: learners copy the 1–5 scale and question numbers into an exercise book and mark their answers there instead of on the tick-box grid.
- No photocopier: read questions aloud to the whole class, with learners marking privately on a numbered sheet at their own pace.
- Large classes: learners self-score in pairs during Session 2 to keep the Scoring Key and Lookup Table step moving.
- No computers or internet are needed at any point — the workbook and this guide are both designed to work entirely on paper.

Handling Sensitive Moments and Common Questions

Situation	What to do
A student's result doesn't match what their parents or guardians want them to study.	Do not treat the workbook as overriding family input. Acknowledge both: "Your result is one useful piece of information about yourself — it sits alongside what your family wants for you and what the school advises, not above them." Offer to help the student prepare for that conversation at home rather than have it for them.
A student is upset or defensive about their Shadow orientation.	Reassure them immediately: Shadow means quietest right now, not broken, and everyone has one. Redirect attention to their Dominant and Secondary strengths. If distress continues beyond the session, refer to the school counsellor for follow-up unrelated to this activity.
A student refuses to share their result with the class.	That is always their right. Completing the workbook can be a required class activity; sharing the result out loud must always stay voluntary.
A student asks if this is a "real" personality test.	Be direct: no. It is a structured self-reflection tool for discussion, not a scientifically validated psychometric instrument. Treat it as a conversation-starter, not a verdict.
A school wants to use results to assign subject combinations or streams.	Do not do this. The workbook must never be used to administratively place, restrict, or stream students. It is an input into a conversation the student has with a trusted adult, not a placement test.

Follow-Up and Referral

This activity is a career-guidance conversation-starter, not a counselling intervention. Where a learner needs support beyond that scope, the facilitator uses the school's normal referral route:

- Emotional or personal distress unrelated to careers: refer to the school counsellor as normal.
- Subject-specific questions: refer to the relevant subject teacher (e.g. a learner interested in Additional Mathematics pathways speaks to the Mathematics department).
- Family disagreement about subject or career choice: offer to help the learner prepare for that conversation, or be present for it if the family and learner both want that.
- Wanting to know more about a specific institution: direct learners to that institution's own admissions office, since entry requirements change.

Quick Reference — The Seven Orientations

Orientation	In one line
 Order Orientation <i>The Builder</i>	You find peace and purpose in structure, planning and building things that last.
 Form Orientation <i>The Creator</i>	You find meaning in imagining new things and giving them shape through art, words, sound or design.
 Coordination Orientation <i>The Orchestrator</i>	You find satisfaction in bringing different people, ideas or tasks together so that they work as one.
 Discovery Orientation <i>The Explorer</i>	You find meaning in asking questions, trying new things and finding out how the world works.
 Integration Orientation <i>The Guide</i>	You find meaning in helping other people understand themselves and grow into their potential.
 Preservation Orientation <i>The Guardian</i>	You find meaning in protecting, maintaining and caring for what already has value.
 Transformation Orientation <i>The Transmuter</i>	You find meaning in turning difficulty into strength and in changing things that no longer work.

Completion Record

Used only to track who has completed the activity — never to record a learner's Dominant/Secondary/Shadow result. Personal results belong to the learner.

Learner name	Date completed	Sessions 1-3 done?	Facilitator notes

PART THREE

Pilot Plan & Feedback Toolkit

Testing the material with real Form 3/4 learners before rollout

This toolkit plans and records a real-classroom pilot of the material set out in Parts One and Two, and produces the evidence attached to the CDC submission package.

Why Pilot This First

A pilot turns careful design into evidence: real Form 3/4 learners working through the material, with the timing, wording and facilitation checked against what actually happens in a classroom, not only against the plan on paper. This toolkit exists so that the pilot produces useful, honest evidence rather than an unstructured impression.

Before You Begin — Permissions and Ethics

- Get written authorisation from the school's Head Teacher before running any session — the material has not yet received CDC endorsement at the point of piloting.
- Notify parents/guardians in advance, in simple terms: a career-guidance self-reflection activity will run during Guidance and Counselling / Civic Education / co-curricular time; it is not a graded test.
- Tell learners plainly that this is a trial version and their honest feedback — including criticism — is wanted and will be used to improve it.
- Follow the facilitator's guide's own ground rules throughout: participation in the activity can be required as normal classwork, but sharing a personal result out loud is always voluntary.
- Do not record any learner's actual Dominant/Secondary/Shadow result as pilot data. Collect only the anonymous, aggregate feedback described below.

Pilot Scope

- Two to three schools, chosen to vary rather than to flatter the workbook — at least one under-resourced setting, to genuinely test the facilitator's guide's adaptations for schools without enough printed copies or a photocopier.
- At least two classes; roughly 40–100 learners in total is enough to surface real patterns without needing a large-scale trial.
- One facilitator per class, each having read the facilitator's guide in full beforehand.

Timeline

When	What happens
Week 1	Get school authorisation; notify parents/guardians; facilitator reads the full facilitator's guide
Week 2	Run Session 1 (Introduction & Self-Assessment) and Session 2 (Scoring & Reading Your Result)
Week 3	Run Session 3 (World of Work, Decisions, Pathways & Working Together); collect student and facilitator feedback immediately after
Week 4	Compile findings into the Pilot Summary Report; decide what, if anything, changes

When	What happens
	before submission

Facilitator Observation Log

One row per session, completed during or immediately after running it.

Session	Planned time	Actual time	What worked / what needed rephrasing	Sensitive situations?
1				
2				
3				

Student Feedback Form (anonymous)

No name field. Handed out after Session 3. Read each statement aloud if literacy varies, and remind learners this is about the workbook, not about them.

Statement	1 No	2	3 Not sure	4	5 Yes
The instructions were easy to understand.	☐	☐	☐	☐	☐
The questions made sense to me.	☐	☐	☐	☐	☐
My result felt like it described me, at least partly.	☐	☐	☐	☐	☐
I found out about a subject, institution or career I hadn't thought about before.	☐	☐	☐	☐	☐
I would recommend this activity to a friend in another class.	☐	☐	☐	☐	☐

Was anything in this workbook confusing, upsetting, or something you think should change? (write freely below)

Facilitator Feedback Form

Completed by the facilitator after all three sessions, in their own words:

- How long did each session actually take, compared with the guide's estimate?
- Which parts of the facilitator's script needed rephrasing or extra explanation?
- Did any sensitive situations or common questions come up? How were they handled, and did the guide's suggested response work?
- Did the Working Together activity work as written? Did groups need more or less than 5–8 minutes?
- Would you recommend this workbook for full rollout in Form 3/4 Guidance and Counselling? Why or why not?
- Any other comments, corrections, or suggestions?

Pilot Summary Report

Completed once the pilot has taken place. This is the page attached to the CDC submission package as evidence.

School(s) involved	
Dates piloted	
Number of learners	
Number of facilitators	
Key findings — timing	
Key findings — comprehension issues found and fixed	
Key findings — sensitive situations encountered and how handled	
Overall learner reception	
Overall facilitator reception	
Changes made to the workbook or facilitator's guide as a result	

Sign-Off

Name & position	Signature	Date

Implementation Status

Two items remain open ahead of full CDC endorsement, recorded here for transparency:

- Syllabus verification: this mapping (Part One) is grounded in the 2023 Zambia Education Curriculum Framework, which sets out the PSVE structure and the pathway system with page-cited authority, but does not itself contain a separate, numbered Guidance and Counselling syllabus of the kind subjects like English or Biology have. Whether a more granular syllabus document exists beyond this Framework is a question for CDC or a serving Guidance and Counselling teacher to confirm.
- Classroom pilot: the Pilot Summary Report (Part Three) is the evidence a curriculum body expects to see alongside a submission of this kind. It is included here as a toolkit, ready to be completed once a real-classroom pilot has been run; the pilot itself has not yet taken place.
